Mohammed Kashif

Cloud Engineer | GCP | Terraform | Infrastructure Automation

Bengaluru, India

+91-8904006956 | kashifxmk@gmail.com | GitHub | LinkedIn

Professional Summary

Cloud Engineer with 1+ years of experience in enterprise cloud infrastructure, GCP, Private Cloud, and infrastructure automation. Hands-on experience with Terraform-based infrastructure provisioning, Linux administration, cloud networking, virtualization, monitoring, and production infrastructure operations. Experienced in managing compute resources, IAM, VPC, firewall policies, infrastructure lifecycle management, and troubleshooting distributed infrastructure environments. Strong foundation in Python, Shell Scripting, Git, and CI/CD fundamentals. Recognized with a Spot Award at L&T Finance for contributions to Private Cloud and Infrastructure as Code initiatives.

Technical Skills

Cloud Platforms: Google Cloud Platform (GCP), Private Cloud, Multi-Cloud, Apache CloudStack
GCP Services: Compute Engine, VPC, IAM, Service Accounts, Firewall Rules, Cloud Monitoring
Infrastructure as Code: Terraform, Infrastructure Provisioning, Reusable Modules, State Management, Plan and Apply Workflows
Infrastructure: Linux Administration, Virtualization, Compute, Storage, Server Management, High Availability, Disaster Recovery
Networking: TCP/IP, DNS, DHCP, VLANs, VPNs, Routing, Switching, Firewalls, Load Balancing
DevOps & Automation: Git, CI/CD Fundamentals, Python, Shell Scripting, Infrastructure Automation
Monitoring & Observability: Grafana, Zabbix, Icinga, Dashboards, Alerting, Incident Management
Programming & Databases: Python, Java, JavaScript, Node.js, React.js, MySQL, PostgreSQL, MongoDB

Professional Experience

Cloud Engineer | L&T Finance *Jul 2025 – Present*

- Manage enterprise cloud infrastructure across GCP, Private Cloud, and multi-cloud environments, supporting production workloads, infrastructure reliability, and operations.
- Provision and administer IaaS resources, virtual machines, Linux servers, compute, storage, and Apache CloudStack infrastructure.
- Automate infrastructure provisioning and lifecycle management using Terraform, improving deployment consistency and repeatability.
- Configure and troubleshoot cloud networking components, including VPC, IAM, firewall rules, DNS, DHCP, VLANs, VPNs, routing, and connectivity issues.
- Develop monitoring dashboards and alerting using Grafana, Zabbix, and Icinga to improve infrastructure visibility, operational monitoring, and incident response.
- Troubleshoot production infrastructure incidents and support high availability, disaster recovery, capacity management, and infrastructure security in collaboration with networking and data center teams.

Apprentice Software Engineer | Target *Jan 2025 – Jul 2025*

- Developed application features using SwiftUI, following clean architecture and software engineering practices.
- Integrated REST APIs, implemented unit testing using XCTest, and participated in Agile development, sprint planning, and collaborative code reviews.

Projects

Enterprise Private Cloud Infrastructure

- Contributed to building and managing an enterprise Private Cloud environment covering physical server provisioning, hardware lifecycle management, virtualization, networking, storage, and cloud infrastructure.
- Administered Apache CloudStack, Linux servers, virtual machines, compute resources, and IaaS operations.
- Supported Terraform-based infrastructure automation, resource allocation, infrastructure security, and high-availability operations.
- Implemented monitoring dashboards and alerting using Grafana, Zabbix, and Icinga for infrastructure visibility and operational troubleshooting.

AI Mock Interview & ATS Platform | MERN Stack

- Developed an AI-powered recruitment platform featuring resume scoring, keyword matching, missing-keyword analysis, and AI-driven mock interview simulations using React.js, Node.js, MongoDB, and Gemini AI.

Education

Bachelor of Technology in Computer Science & Engineering *2021 – 2025*
Jain University, Bengaluru CGPA: 8.6/10

Achievements

- Received the **Spot Award at L&T Finance** for contributions to Private Cloud and Infrastructure as Code initiatives.
- Winner – Tech Treasure Hunt (2023).
- Co-author of international conference research papers (2024, 2025).
